Detailed Design
Production startup

SustainSolutions Breathe 55

Product Concept, Detailed Design
Production startup

**2011 –****Radmer
Engineering ApS****Freelance product development consultant**

- Mechanical Product development of Medico-, Mechatronics-, Consumer products and Machine design
- Projects: Novo Nordisk (insulin devices), Aker Solutions (oil drilling equipment, U-Vivo (Medical Device), Ictal Care (Medical Device), LabFlex (laboratory equipment), XO Care (Dental equipment)

2004 – 2011**IPU Product
Development
2800 Kgs .Lyngby****Product development consultant at IPU**

- Project Management, Product Concept design, Product Development, Detailed Design
- Product development of Medico and Mechatronics products from first idea to finished product
- Conceptual and detailed design of oil drilling equipment: Dolly design (2 launched products finished incl. detailed drawings), Travelling Block Dolly (finished incl. drawings) and Roughneck concept design. Detailed drawings.

1999 – 2004**Novo Nordisk A/S
3400 Hillerød****Development of devices for insulin dosing**

- Concepts, development and maturing for production of FlexPen launched 9/11-2002, still in production in large numbers worldwide
- Systematic conceptual work, creating product specifications
- Preparing and running market research and focus group studies
- Industrial Design responsible, working with external industrial designers
- Responsible for development of User Interface and MMI testing
- CAD experience in Pro Engineer and PDMlink

1990 – 1999**IPU
Konstruktions-
teknik 2800 DTU
Lyngby****Product development consultant at IPU**

- Project management, Concept development, Product development and detailed design
- Systematic product development, DFM and QFD knowledge
- CAD Responsible, installation and maintenance of 2D og 3D CAD

1989 – 1990**LK A/S
2740 Skovlunde****Development Engineer**

- New Mechanical development function in the electronic dept.
- Light controls, 'The intelligent House'
- Mechanic/electronics cooperation, User Interface Design

1989 – 1990**JAI Engineering
2600 Glostrup****Development Engineer, Surveillance Cameras**

- Product concept, detailed design and production startup of a new series of surveillance CCD cameras
- Modularisation and variants creation, mechanics and electronics
- CAD responsible: Installation, maintenance and support

Education

1986 Engineering Academy, Machine Department, Mechatronics design project: Automatic sun measuring device developed and made
1982 Sankt Annæ High School, Mathematic/Physics
1979 Avedøre School, 9. Grade

Hobbies

Musician/singer with home recording studio, motorbike racing, DIY projects on cars, motorbikes, house.
